BLUEBERRIES

Tender, Tangy, Tasty

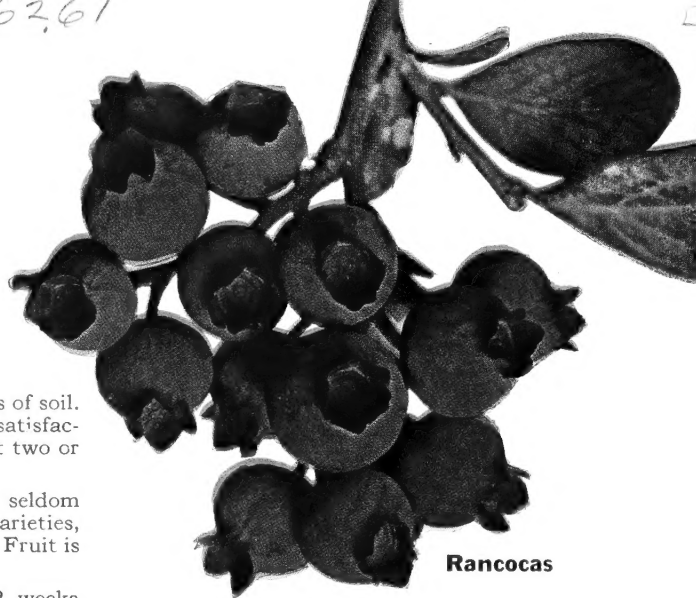

Cultivated Blueberries grow in large clusters, plump, tender, and practically seedless with the delightful tang of the wild fruit. In addition to bearing large crops, it is a nice bush to add attraction to a lawn or garden. Blueberries require an acid soil which contains an abundance of peat moss or other partly decayed vegetable matter. If your soil is deficient in this material, a heavy application of peat, rotted sawdust, or other material should be made and worked into the top 6 inches of soil. Plant 3 to 4 ft. apart in rows 6-8 ft. apart. Will produce satisfactorily for 50 years, or more. For proper pollination, plant two or more varieties. We recommend the following:

CABOT (Early)—Bush is rather low and spreading, seldom reaching a height exceeding 4 feet. One of the earliest varieties, a good producer, excellent flavor, and a good shipper. Fruit is large, firm, and attractive.

RANCOCAS (Mid-Season)—Popular. Ripens about 2 weeks after Cabot. The bush is tall, vigorous, and productive. The fruit is large, light blue, firm, and attractive.

RUBEL (Mid-Season to Late)—Tall, well shaped bush, attractive appearance, excellent producer, good quality, slightly tart berry.

JERSEY (Late)—Tall, well shaped bush, attractive appearance, excellent producer. Large, good quality berry.

PEACHES!

... FOR QUALITY

GOLDEN JUBILEE

We recommend this New Jersey Experiment Station introduction. Comparatively new, but widely planted; is a real money maker. Unusually hardy, resists excessive cold. Sure cropper, after severe winters and heavy frosts. Golden Jubilee is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy, and sweet. August 20-25th.

ELBERTA • The Money-Maker!

The leader of all Peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no Peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful Peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is harder in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy, and high flavor; flesh yellow, freestone. Season medium early, following quick upon Early Crawford. September 15-20th.

GRAPES

LAST A LIFETIME

PRICES ON STRONG 2 YEAR No. 1 VINES ALL VARIETIES (Except as Noted). Strong, 2-yr. No. 1 Vines—30c each, 75c per 3, \$2.00 per 10, \$7.00 per 50, \$12.00 per 100.

AGAWAM (Red)—A large red grape with rich aromatic flavor. A strong grower and very productive. (Oct. 1 to 5.)

CACO (Red)—A new wine red grape which is proving to be a great favorite. Berries very large and sweet. (Sept. 15.) 40c each, \$3.00 per 10, \$18.00 per 100.

CATAWBA (Red)—Dark red. Bunches large, berries medium. Best for table and wine. (Oct. 5 to 10.)

DELAWARE (Red)—Bunches and berries small. Light red, unusually sweet and delicious. One of the best red varieties. (Oct. 1 to 5.)

CONCORD—The Favorite!

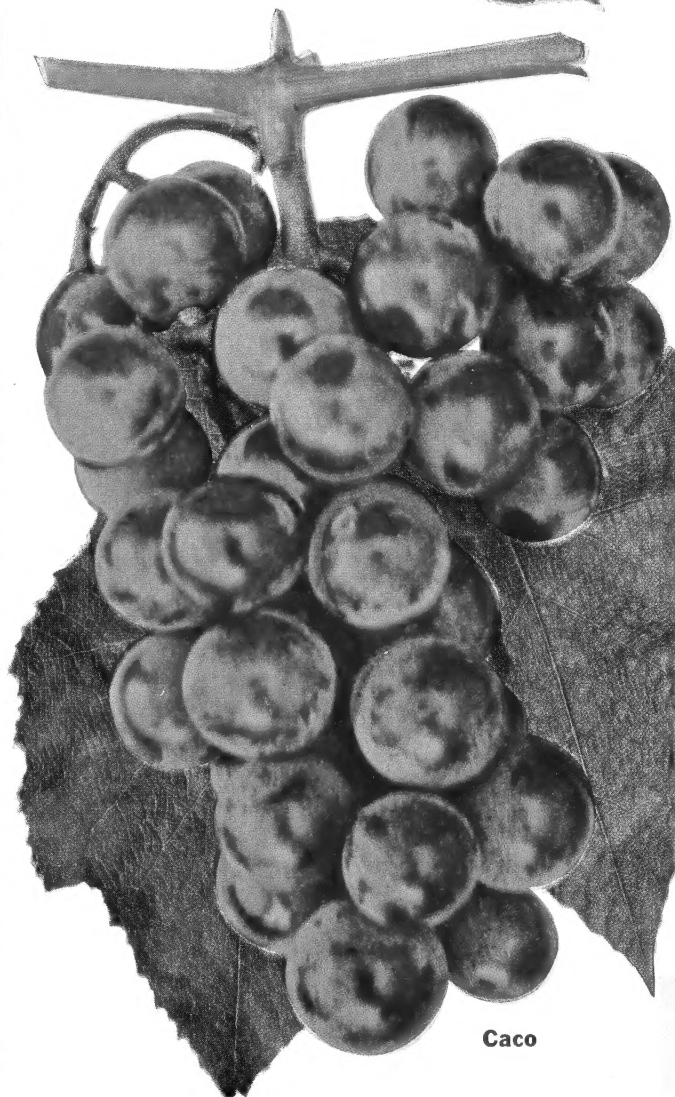

The leading commercial grape. Color blue-black. Bunches and berries large. Hardy, productive, and an excellent shipper. Succeeds over large area. Excellent for grape juice. (Sept. 25 to 30.) 25c each, 3 for 60c, \$1.50 per 10, 50 for \$4.50, \$8.00 per 100.

New! FREDONIA

The leading early black grape. An introduction of the N. Y. State Experimental Station. Plant is a strong, healthy grower; clusters medium in size; berries large and juicy. (Sept. 5 to 10.)

CONCORD SEEDLESS (Black)

New attractive garden novelty. No seeds, plants vigorous, hardy. Fruit small and of fine flavor. Good for pies. (After Concord.) 90c each, \$7.50 per 10.

Caco

HALE HAVEN

Marvelous new peach, a result of crossing the famous J. H. Hale with South Haven. A large beautifully colored, yellow fleshed peach, ripening approximately ten days to two weeks ahead of Elberta. Perfect freestone, strong grower, good shipper, and a prolific heavy bearer. The tree is hardy and fruit is of the highest quality. Has extremely high color which is present several days before the fruit ripens, thus allowing early picking for distant shipments. Should be included in every planting. Sept. 1-5th.

VALIANT

Large, yellow freestone, very good quality. Productive. Early September.

ROCHESTER

A comparatively new extra early peach of the highest quality and most delicious flavor. Large yellow, with attractive red blush. A very fine canner, prolific, and an early bearer. Freestone. August 29-Sept. 3rd.

EARLY ELBERTA

An excellent new variety resembling Elberta very closely, except a little rounder in shape and about ten days earlier in ripening. Freestone. September 6-10th.

PRICES ON PEACH TREES

	1-9 Each	10-49 Each	50-300 Each

1 Year 2 to 3 ft. 5/16 to 7/16 in.	.40	.30	.25

GOLDEN MUSCAT

Wonderful new golden yellow grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine muscat aroma of European muscat. Vine is vigorous, productive; the clusters are very large and compact. Berries are large, juicy, sweet, and tender. (Sept. 27 to Oct. 5.) 90c each, \$7.50 per 10.

SENECA (White)—New pure vinifera. Best dessert variety. Flavor sweet, vinous and aromatic. Plant vigorous, productive, hardy. (Sept. 1 to 8.) 90c each, \$7.50 per 10.

SHERIDAN (Black)—An improved Concord, with firmer, sweeter berries. Large and more compact. About a week later.

WORDEN (Black)—A large early black grape of fine quality. Berries and bunches large. (Sept. 20 to 25.)

VAN BUREN (Black)—Best new very early grape. Desirable for home and commercial planting. Resembles Concord in size, but much sweeter. (Aug. 27 to Sept. 2.) 75c each, \$6.00 per 10.

New!

Thornless Boysenberry

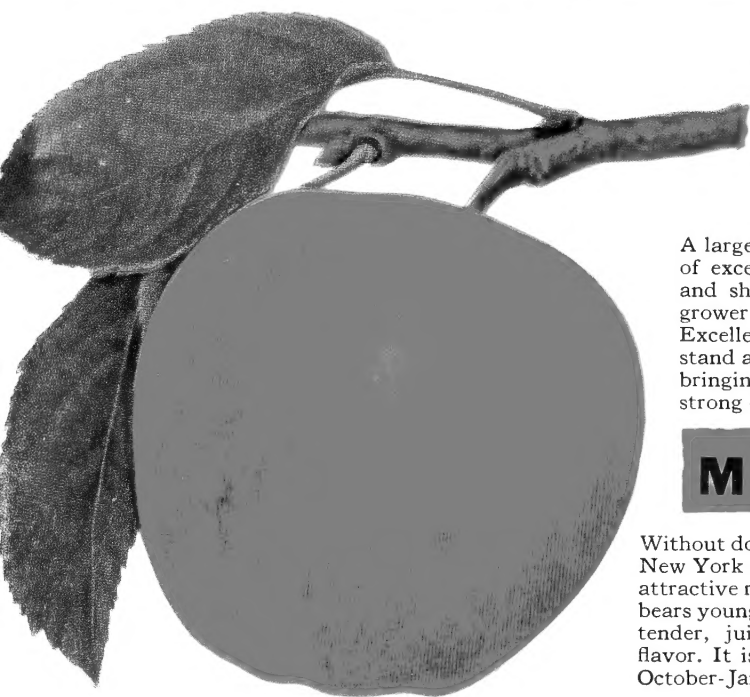

Canes smooth as velvet. Ripens 10 days to two weeks earlier than the common Boysenberry. The Thornless strain has retained all the good characters of its parent including its rugged, thrifty growth. It's a pleasure to pick these large berries, without a chance of scratching your hands.

Strong 1-yr. Plants 25c each, 3 for 65c, \$1.85 per 10, \$3.50 per 25

Have you mislaid your copy of our 1943 catalog? If so, just ask us for another. We'll be pleased to send it.

KELLY'S SELECTED-INSPECTED APPLES

PLANT THEM NOW—WHILE PRICES ARE STILL LOW

RED DELICIOUS

A large, dark red apple with crisp, fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Tree one of the hardiest, a vigorous grower with good foliage. A regular annual bearer. Excellent for eating, and the most popular fruit stand apple. Packs well in boxes and bushels, always bringing high prices on the leading markets, and in strong demand by the best trade. December-March.

McINTOSH RED

Without doubt the leading commercial variety of New York and the New England States. A very attractive red apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy, and refreshing with attractive flavor. It is especially desirable for fancy trade. October-January.

KENDALL

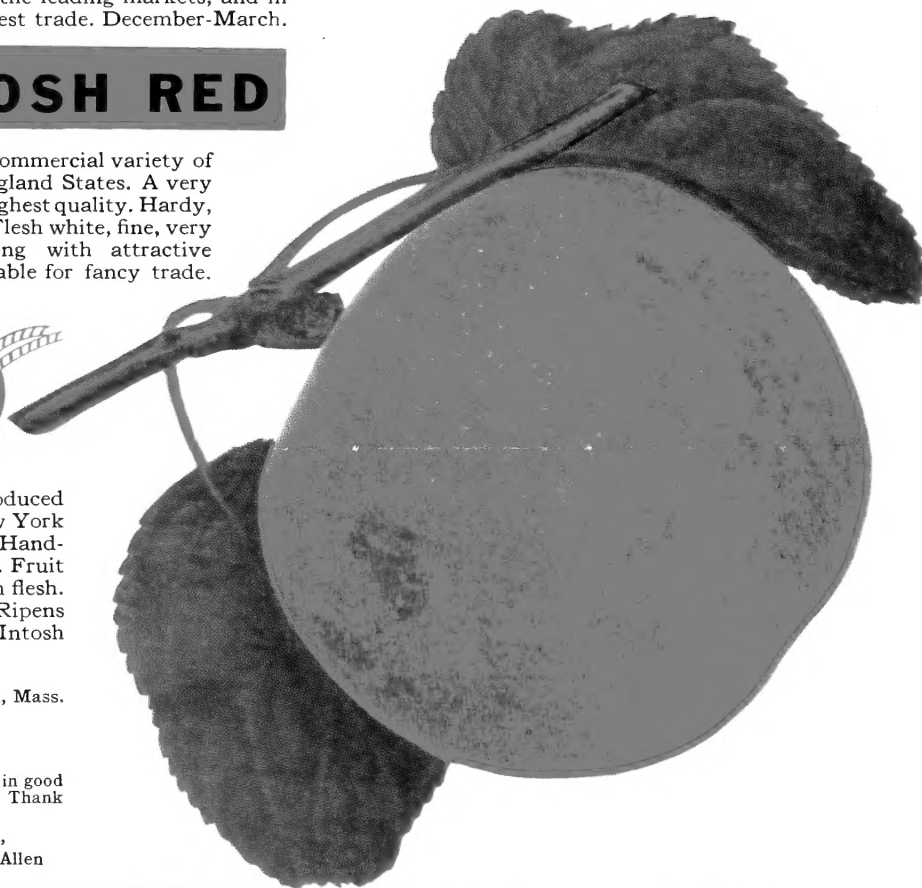

A new McIntosh seedling introduced and recommended by the New York State Experimental Station. Handsomely colored solid dark red. Fruit large with fine grained whitish flesh. Excellent quality and flavor. Ripens about the same time as McIntosh but keeps longer.

333 Moody St., Waltham, Mass.
Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

The apple trees you sent me arrived in good condition at my home in Weston. Thank you for your good service.

Sincerely yours,
Paul R. Allen

RHODE ISLAND GREENING

This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper, but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and an abundant yielder. December-April.

RED ROME

Another new red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. December-May.

2 Year 4 to 5 ft. 9/16 to 11/16 in.	.80	.70	.45

DOLGO CRAB—A handsome hardy red crab apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. September 1-10th.

HYSLOP—Fruit large, very brilliantly colored, dark red or purplish over-spread with thick blue bloom, borne in attractive clusters. The tree is a good grower, very hardy, and a reliable cropper yielding good crops biennially or in some cases annually. It is desirable both for home use and for market. One of the best known and most widely propagated varieties. September 15-25th.

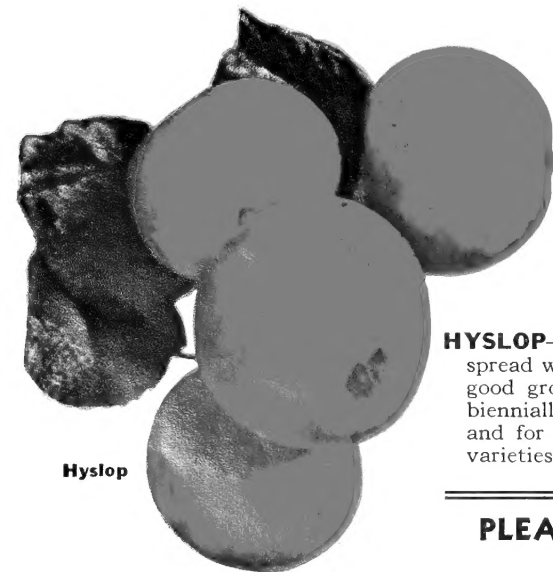

EARLY McINTOSH

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform round shape. The tree is a vigorous grower, hardy and productive. It is an annual bearer, and early thinning is recommended. Under favorable conditions of growth it comes into bearing at an early age. Besides pleasing the taste, this early apple pleases the eye. The flesh is white, tender, and juicy with fine flavor. Ideal dessert apple. August 15-25th.

MILTON

This handsome new apple of the McIntosh type ripens with Wealthy and a month before McIntosh. The tree is hardy, vigorous and an annual bearer. Color is beautiful pinkish red with heavy bloom. Flesh white with flavor more sprightly than McIntosh. Sept. 10-20th.

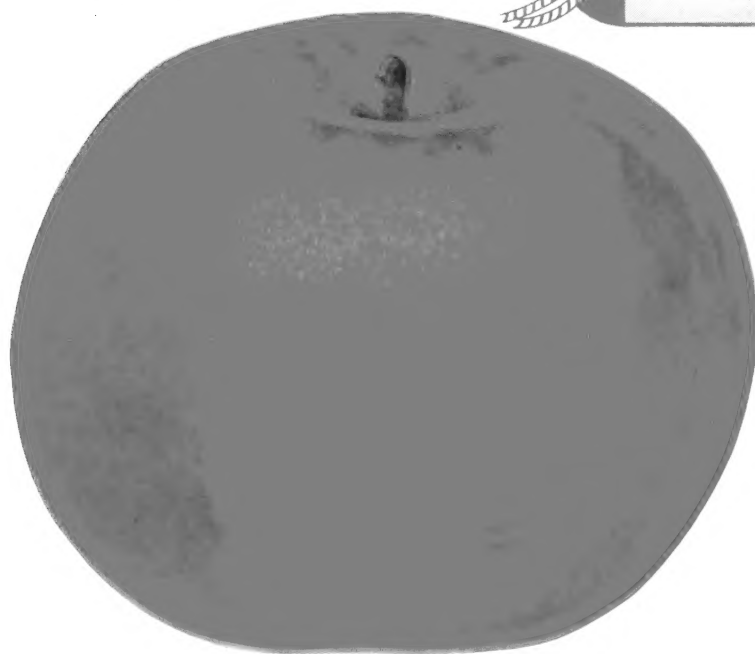

PLEASE REFER TO OUR 1943 CATALOG FOR COMPLETE LIST OF VARIETIES

Hyslop

PLANT THESE VARIETIES... TOPS ON OUR LIST!!!

CORTLAND

A comparatively new apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and tendency to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. The

fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, blushed with darker red, splashed and striped with carmine and more or less overlaid with a deep purplish bloom. October-February.

NORTHERN SPY

A leading commercial variety. Fruit is large and very attractive, being of bright red color with a delicious bloom. Flesh is juicy, crisp, and excellent for dessert or culinary use. Its fine reputation brings high prices in the market and the fruit is always in demand. Fruit keeps well in storage until April or later. November-April.

RED SPY

A new red sport identical with Northern Spy except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive. November-April.

STAYMAN'S WINESAP

Fruit medium to large size. Skin smooth, slightly striped, coloring to dull red. Productive and early bearer. December-March.

BALDWIN

Long a favorite with commercial orchardists for which no substitute has yet been found. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy, and rich. Tree vigorous and productive. December-March.

YELLOW TRANSPARENT

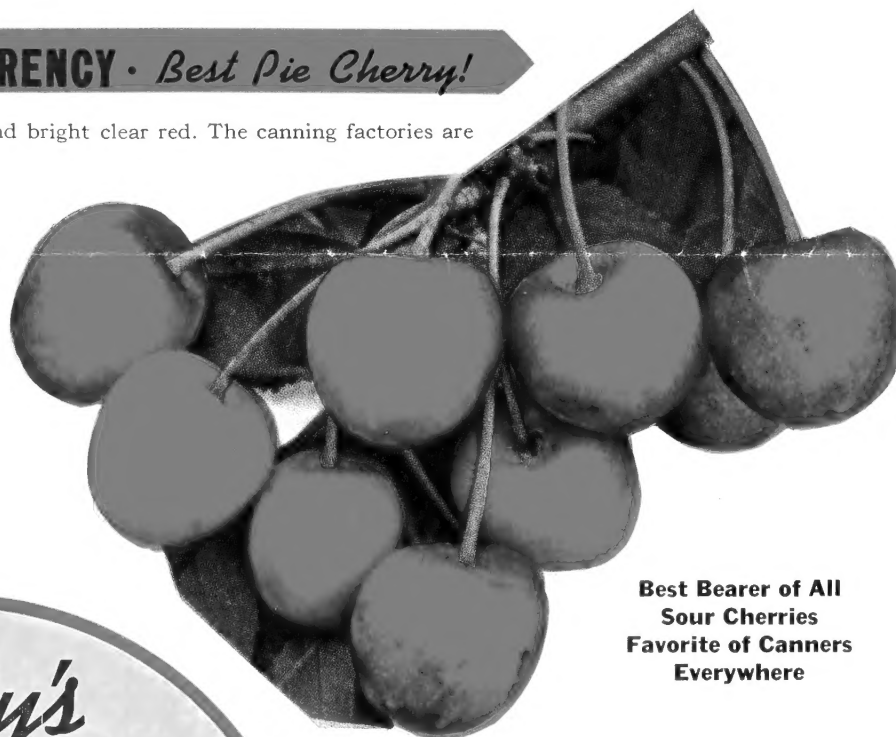

Tree upright, and a very early and abundant bearer. Fruit of good size; skin clear white turning to a pale yellow; flavor acid and very good. August 3-7th.

JONATHAN

A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November-April.

LARGE MONTMORENCY • Best Pie Cherry!

Fruit is good-sized, fine flavored and bright clear red. The canning factories are always calling for them and buy them by the hundreds of tons. The best of all sour varieties; is a good shipper, very attractive and always brings good prices. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all other sour varieties. Montmorency can always be depended upon for a full crop, no matter how unfavorable the season may be. Montmorency is the nation's most popular sour Cherry. Whether preserved at home, or commercially, it retains fine color and quality. (July 15th.)

Best Bearer of All
Sour Cherries
Favorite of Cannors
Everywhere

SWEET CHERRIES

BLACK TARTARIAN—Bright purplish black, very large, rich, and juicy, half tender. Tree vigorous, erect; heavy bearer. (June 30 to July 4.)

NAPOLEON (Royal Ann)—Good for market and canning. Large size, beautiful cherry, pale yellow with bright red cheek; sweet, juicy, and firm. The leading white sweet Cherry. (July 7 to 10.)

SCHMIDT'S BIGGAREAU—Large size fruit of deep mahogany color. Flesh dark, very juicy, tender, and has fine rich flavor. An excellent shipper. Fruit grows in clusters. (July 10.)

WINDSOR—Fruit very large, juicy, and firm; flesh pinkish and sometimes streaked. Good quality; excellent bearer. Tree upright, vigorous, and rapid grower. Popular for its large size and dark color; almost black. One of the leading commercial sorts. (July 20 to 26.)

KELLY'S PEARS

Never miss a crop—
plant with confidence!

Dates after each description indicate the approximate picking date in Western New York. Months indicate the time at which the fruit is ripe and suitable for home consumption.

ANJOU—Is a vigorous grower, hardy, and prolific. The pears are of large size, green in color, yellow when ripe. Very juicy, luscious, and of the best quality. Best for late fall and very early winter use. October to January. (Sept. 25th.)

CAYUGA (New)—A new seedling of Seckel which it resembles in shape and color. Fruit is as large as Bartlett and of high quality. September and October. (Sept. 15-20th.)

BEURRE BOSCH

Very popular variety. Very large, gourd shaped pear, brownish yellow in color. Hangs to tree well on account of its long stem, which allows it to sway in heavy winds. White flesh, rich and delicious. October to January. (Sept. 25-30th.)

BARTLETT

Justly the leading commercial pear—a leader among canning Pears. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky flavor. Tree is a vigorous erect grower and bears abundantly. September-October. Sept. 1-10th.

CLAPP'S FAVORITE

Large, fine, pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail. August. (Aug. 15-20th.)

PLUMS... FOR QUICK CROPS!

ABUNDANCE—Fruit large, very early; amber turning to a rich, bright cherry. Flesh light yellow, exceedingly juicy and tender. Freestone. Excellent for canning. (Aug. 15 to 20.)

BURBANK—Fruit is very large, bright red-purple. Meaty and quite firm. Excellent shipper. Tree hardy, vigorous, and productive. Needs close pruning. (Aug. 25 to 30.)

GERMAN PRUNE—Fruit long, oval, purple with thick bloom. Flesh firm, sweet, and delicious. Excellent commercial sort. Freestone. (Sept. 18 to 22.)

REINE CLAUDE (Bavay's Green Gage)—Large, pale yellow, marked with red; good bearer. (Sept. 25 to 30.)

SHROPSHIRE DAMSON—Medium size dark purple fruit produced in thick clusters. Excellent canner. Tree a good grower and very productive. (Sept. 24 to 28.)

FELLEMBURG

A valuable Plum for dessert, but most esteemed for market and drying or preserving. Fruit long, oval, purple with a thick bloom; flesh firm, sweet, and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices. September 24-26th.

YELLOW EGG—Golden yellow covered with thick bloom. Tree large, very productive. (Sept. 22 to 25.)

LOMBARD—Medium to large, roundish, dark red. Flesh yellow, juicy. Hardy; prolific bearer. Valuable commercial sort. (Sept. 18 to 21.)

MONARCH—Very large, bluish-purple. Juicy, golden green flesh. Bears early and abundantly. Excellent for market. (Sept. 18 to 21.)

Kelly's NUT TREES

BLACK WALNUT—Grows from 40 to 60 feet high. Large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. Trees 4-5 ft., **\$1.75 each.**

BUTTERNUT—Large longish nuts with sweet, oily, nutritious kernels. Trees 3-4 ft., **\$1.50 each.**

CHINESE CHESTNUT—This variety is the best substitute for the native American Chestnut, which can be grown in the blight area. The trees bear very early and the quality of the nut is very good. Trees 3-4 ft., **\$1.50 each; 4-5 ft., \$2.50 each.**

ENGLISH WALNUT—A fine lofty growing tree, producing large crops of thin shelled delicious nuts. Trees 3-4 ft., **\$1.50 each.**

HAZEL NUT (Filbert)—These plants attain the height of a peach tree if kept trimmed to one stem. For best crop production they should be grown in tree form. 2 varieties needed for pollination. 3-4 ft. trees, **\$1.35 each.**

Barcelona—Large nut of round type. One of the newer prolific yielding varieties.

Daviana—Medium in size. Best variety to pollinate Barcelona.

HARRIS—A hardy English sort. Medium size; oblong, orange, good quality, early. July. One of the best varieties.

MOORPARK—Very large, deep yellow, with red cheek. Has the highest quality and finest flavor of all apricots. August.

EARLY GOLDEN—Medium, roundish oval. Skin smooth, pale orange. Flesh yellow, moderately juicy and sweet, with very good flavor. Freestone.

SURE CROP (Nectarine)—The tree is vigorous and productive. The fruit is large, roundish, white and overlaid with very attractive red. The flesh is firm, tender, free from stone, and very pleasing flavor. Really the best variety as to quality, size, and hardness.

NOTICE

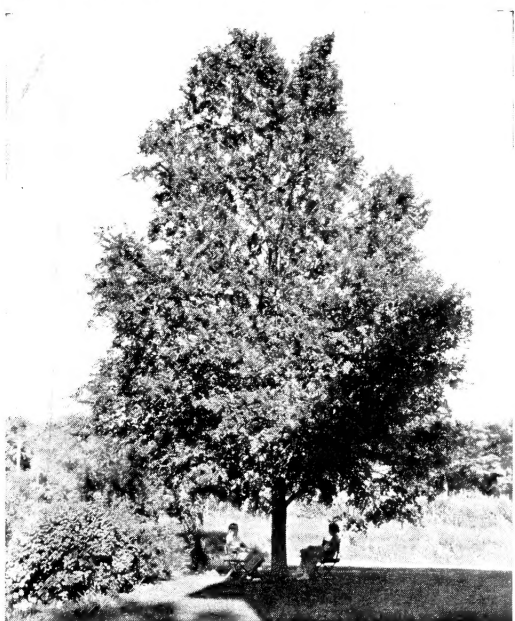

For your convenience we extend our **Special 5% Cash Discount to April 1st.** If you have not as yet ordered—**ORDER NOW**—while our assortment is still complete.

Thank you,
KELLY BROTHERS NURSERIES

CHINESE ELM

FOR QUICK GROWTH

(30-40 ft.)—A very rapid grower with small dense foliage. Resembles Norway Maple in shape. Excellent for tall hedge and windbreak. 6-8 ft., **\$1.25 each**; 8-10 ft., **\$1.50 each**.

Plant QUINCES PROFITABLE—HARDY

Its pre-eminence as a fruit for jellies and preserves makes the quince a profitable tree for the fruit grower, the farmer, or any one having even a small garden. The quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the Winter is complete without the quince. We recommend the following varieties:

ORANGE—Popular, extensively cultivated, reliable, and satisfactory. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking.

WAYNE COUNTY ORANGE—A superior new variety introduced largely through our efforts. Extra large, golden yellow, of excellent quality. Regular cropper. Ripens early September.

Kelly's SHRUBS

For Home Beautification

Strong 2 Year, 2 to 3 ft., No 1. Blooming Size Bushes

PRICES (Except as Noted)

45c each, 3 for \$1.25, 10 for \$4.00

Figures in the brackets following the variety name indicate the approximate height of the shrubs at maturity. No shrub should be allowed to grow taller than you want it. You can keep them pruned to suit yourself.

ALTHEA (Rose of Sharon) (6-8 ft.)—Tall growing shrub that is very effective for group and specimen planting. One of the few shrubs that are in blossom from mid-summer until very late Fall. Choice of Purple, Red, White, and Pink. All double flowering.

BLUE HYDRANGEA (French) (2-3 ft.)—The deep intense blue of this small shrub is truly amazing. The flower is large ball shaped, and the leaves are very shiny and dark green. Must be protected in the winter, but is well worth the effort. 12-18 in., 85c each, 3 for \$2.25.

BUTTERFLY BUSH (Buddleia) (4-5 ft.).

Ile de France—A new variety of more uniform moderate growth. Violet purple clusters bloom in great abundance in mid-summer. Sweet and fragrant. 50c each, 3 for \$1.25.

DEUTZIA GRACILIS (Slender Deutzia) (2 ft.)—One of our best low growing flowering shrubs. White flowers in graceful upright clusters in May and June.

DEUTZIA PRIDE OF ROCHESTER (5-6 ft.)—Beautiful double white flowers tinged with rose in May. One of our most popular shrubs.

FORSYTHIA (Golden Bell)

Fortuni (6 ft.)—Tallest growing of the Forsythias, most stiffly upright in habit. Golden flowers completely cover the branches in early spring.

FLOWERING — QUINCE (Cydonia Japonica) (3-4 ft.)—Completely covered with dazzling scarlet flowers in May, followed by small quince shaped fruits. No planting is complete without one or more of these shrubs.

KERRIA JAPONICA (Golden Kerria) (3-4 ft.)—A semi-dwarf shrub with beautiful shaped flowers of bright orange during July. The branches are light green in winter and therefore very showy. 18 in., 60c each, 3 for \$1.60.

LILAC (Syringa Vulgaris)—The much desired common Lilac. Can furnish purple or white variety.

HONEYSUCKLE, TARTARIAN (6-8 ft.)—Pink flowering shrub that blossoms in May followed by clusters of red berries.

HYDRANGEA ARBORESCENS (Hills of Snow) (3 ft.)—A very showy shrub with ball shaped clusters of pure white flowers from July to September.

HYDRANGEA P. G. (4 ft.)—Popular late summer blooming shrub. The immense cone-shaped blooms are white at first then turn pink and bronze. Grows in sun or partial shade and makes a very conspicuous specimen plant.

INDIAN CURRANT (Coralberry or Red Snowberry) (3-4 ft.)—Dwarf shrub of graceful habit. Rose colored blossoms in June and July, followed by dull red coral colored berries.

PHILADELPHUS VIRGINALIS (Mock Orange) (5-6 ft.)—Has very large, semi-double blossoms, pure white and a continuous blossomer. 18-24 in., 50c each, 3 for \$1.35.

PURPLE FRINGE (Smoke Tree) (6-8 ft.)—Great clouds of misty purple blooms completely cover this shrub in early summer. The blossoms prevail for quite some time. The leaves are exceptionally decorative. Prefers some sunlight. 2-3 ft., 60c each, 3 for \$1.50.

SPIREA VAN HOUTTEI (Bridal Wreath) (4-6 ft.)—Most popular flowering shrub. Suitable for hedge or specimen planting. White flowers in clusters during May and June. 2-3 ft., 25c each, 10 for \$2.00, 100 for \$15.00.

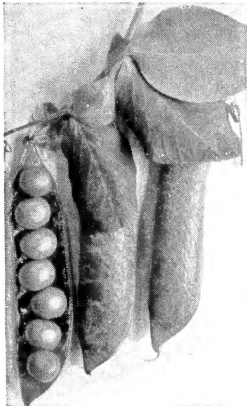

SNOWBERRY (Symphoricarpos R.) (4 ft.)—A well-known shrub with small pink flowers in June, followed with clusters of waxen white berries which remain during winter. Is recommended for shady spots.

SPIREA ANTHONY WATERER (18-24 in.)—A crimson flowered dwarf variety. Makes low compact bush never getting higher than two feet. Covered with blossoms all summer. Hardy and adapted to wide range of soil.

• HEDGES •

BARBERRY THUNBERGI—The best all-purpose hedge. A shrub of marked excellence because of its bright green foliage which changes to brilliant colors in the Fall, and its bright scarlet berries which are very conspicuous throughout the winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. It is very hardy and has never been known to winter-kill. It bears and shears well and makes a dense hedge. 12-18 in., 20c each, \$1.50 per 10, \$10.00 per 100. 18-24 in., 25c each, \$2.00 per 10, \$15.00 per 100.

CALIFORNIA PRIVET—The most popular Privet for hedges. It is upright and stiff in habit. Foliage oval and dark green. It is almost an evergreen. Not so hardy as the others in the extreme northern sections. Is most attractive when trimmed to a height of 2 to 5 feet, about the height of a fence. 18-24 in., \$1.50 per 10, \$9.00 per 100. 2-3 ft., \$1.75 per 10, \$12.00 per 100.

BENDER'S SURPRISE—Salmon fleshed melon. Very popular in New York State. Fruit medium to large, oval shaped, distinctly ribbed. 90 days.

ONION

Pkt. 10c, ½ oz. 45c, oz. 75c

YELLOW GLOBE DANVERS—Standard main crop variety, fine for storage. Bulbs large, round, yellow, firm, white fleshed. 115 days.

PRIZETAKER—Large, yellow onion of very handsome globe shape. Flavor mild. Very productive. 105 days.

PEAS

Pkt. 10c, ¼ lb. 20c, 1 lb. 45c, 5 lbs. \$2.00

ALASKA—Earliest pea known. Small round smooth peas. Pods grow about 2½ inches long. Straight and blunt at the end, light green. 55 days.

GILBO—Vines grow 26 to 28 in. tall, are heavy producing; well filled pods 4½ to 5 inches long, of dark green color. Resistant to Fusarium wilt. Seed green and large. 72 days.

IMPROVED TELEPHONE (Dark Podded Strain)—Standard main crop pea. Pods 4½ to 5½ inches, are dark green, and contain many well wrinkled peas. 73 days.

LITTLE MARVEL—A productive dwarf sort, the vines growing 15 to 20 inches high. Dark green, plump, well filled pods. 62 days.

THOMAS LAXTON—For many years a favorite early sort. Pods are dark colored, 3½ inches long and contain many wrinkled and very sweet peas. 62 days.

PARSNIP

Pkt. 10c, oz. 25c

IMPROVED HOLLOW CROWN or GUERNSEY

—A wonderful cropper. Long white roots, tender, sugary. Roots 12 to 15 inches long, 3 inches thick at shoulder. Tapered and smooth. 95 days.

PEPPER

Pkt. 10c

EARLY CALWONDER—Smooth, uniform, deep green, 4 lobed fruit. Flesh thick, sweet and mild. 69 days.

RADISH

Pkt. 10c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.50

FRENCH BREAKFAST—Oblong roots, scarlet color with a white tip. Half an inch thick by 1½ inches long. 25 days.

EARLY SCARLET WHITE TIP—Round and smooth. Color dull scarlet-red with one-third white area at bottom. Flesh white, crisp and tender. 26 days.

WHITE ICICLE—Pure white, delicious, crisp flesh, always tender, juicy, and delicately snappy. Roots grow about 5 inches long, the shape of an icicle. Straight and free from side roots. 27 days.

PARSLEY

Pkt. 10c

CHAMPION MOSS CURLED—Leaves uniform dark green color, finely cut and closely curled. 70 days.

SPINACH

Pkt. 10c

BLOOMSDALE LONG STANDING SAVOY—The standard long standing, dark green, crumpled leaf variety. Plant large, erect and sturdy. 42 days.

NEW ZEALAND—Large, spreading plants with small, pointed leaves. Thrives in hot weather. Seeds large and hard-horned. 70 days.

PUMPKIN

Pkt. 10c, oz. 15c, ¼ lb. 45c

SMALL SUGAR or NEW ENGLAND PIE—Small orange skinned, slightly ribbed. Finest quality flesh and most popular for pies. 108 days.

SQUASH

Pkt. 10c, oz. 20c, ¼ lb. 60c

EARLY PROLIFIC STRAIGHTNECK—All-American Silver Medal for 1938. Early, of bright lemon-yellow color. 50 days.

CHICAGO WARTED HUBBARD—Largest and best rough skinned Hubbards. Large heavily warted fruits of fine form, rich dark green color. Flesh golden yellow, dry and sweet. 105 days.

DELICIOUS (Green)—Medium size, top-shaped winter sort, with dark green skin. Flesh very thick and bright yellow. 102 days.

GIANT SUMMER CROCKNECK—Larger, later, more warted strain of crockneck. Light yellow, flesh thick and yellow. 58 days.

TABLE QUEEN—Very early; extremely prolific. Dark green fruits pointed acorn shape. Flesh light yellow, bakes well with good flavor. 58 days.

TOMATO

Pkt. 10c

BONNY BEST—Splendid large second early tomato. Slightly flattened globe shape. Smooth, solid, bright scarlet. 73 days.

PRITCHARD—Fusarium wilt resistant. Fruit thick, globular. Color light scarlet. 76 days.

MARGLOBE—Produces medium size, smooth, deep, globe-shaped, meaty, bright red fruits in clusters of 5 to 7. Heavy producer. Resistant to Fusarium. 77 days.

TURNIP

Pkt. 10c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25

PURPLE TOP STRAP LEAF—Early sort with purple shouldered white flat roots. Flesh white, fine grained, and tender. 46 days.

PURPLE TOP WHITE GLOBE—A large globe-shaped variety. Very smooth, upper part purple red, white below. 57 days.

AMERICAN PURPLE TOP—Dependable variety. Roots large, globular, neck small. Flesh light yellow, firm, and of good texture. 90 days.

STRAWBERRIES

PRICES—25 plants 65c, 50 plants \$1.00, 100 plants \$1.50, 500 plants \$4.50, 1000 plants \$8.00

All Strawberries sent Postpaid or Express Prepaid

PREMIER—An early, productive variety of unsurpassed quality.

DORSETT—An extra early self-pollenizing offspring of Premier. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX—Another excellent new variety, ripening early, about the same time as Premier. Very vigorous and a fine plant maker.

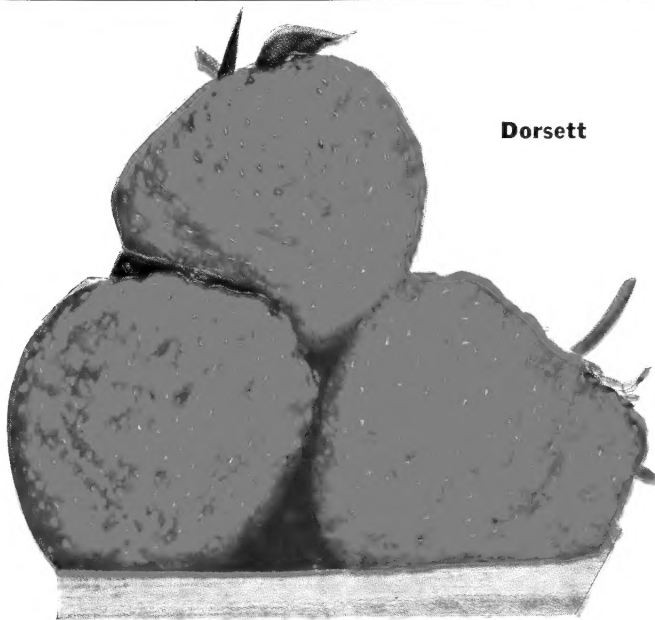

CATSKILL—Plants large, very vigorous, yield very heavy crops. Berries very large, slightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild subacid and good quality.

EVERBEARING VARIETIES

PRICES—25 for \$1.00, 50 for \$1.50, 100 for \$2.50, 500 for \$8.00, 1000 for \$15.00

GEM—Very hardy, plants freely. Berry is dark red, large, sweetish tart flavor. Plants medium in size and immune to disease.

MASTODON—Without question the finest of the Fall or Everbearing varieties. It produces an immense crop in June and an abundant crop in the fall. Most prolific of all the Fall varieties.

Dorsett

Eldorado Blackberry

The hardiest and sweetest blackberry. Berries are large, jet black, borne in large clusters, very sweet, and practically coreless.

\$1.50 per 25, \$3.75 per 100, \$13.00 per 500

RASPBERRIES

INDIAN SUMMER—New, Everbearing Red Raspberry. Berries large, conical, much superior in quality and size to any of this type. (June 28 to July 1.) (Sept. 15 to freeze.) **\$1.75 per 25, \$4.75 per 100, \$17.00 per 500, \$33.00 per 1000.**

LATHAM (Red)—Large, mosaic free, round, firm, brilliant red. Most profitable commercial variety. Hardy, very prolific, an excellent shipper, and a perfect variety for canning. Ripens evenly over a very long season. (July 6 to 10.) **\$1.50 per 25, \$4.25 per 100, \$15.00 per 500, \$27.00 per 1000.**

NEWBURG (Red)—A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy, and very productive. (July 4 to 6.) **\$1.50 per 25, \$4.25 per 100, \$15.00 per 500, \$27.00 per 1000.**

SODUS—New Purple Raspberry from New York Experimental Station. Fruit is large, firm, medium purple color, and does not crumble. Plants hardy and very productive. (July 10 to 12.) **\$1.50 per 25, \$4.25 per 100, \$15.00 per 500, \$27.00 per 1000.**

TAYLOR—A new Red Raspberry introduced by the New York State Experimental Station. Plants are vigorous, hardy, and productive. Long, conical shape, firm, thick flesh. Excellent quality, ripens just before Latham. (July 8 to 12.) **\$1.50 per 25, \$4.25 per 100, \$15.00 per 500, \$27.00 per 1000.**
